个人陈述

1. 你参与本访学项目的动机是什么？

我来自四川自贡的一个偏远农村，父母在外辛勤打拼，为我创造了一个虽不富裕却始终充满温暖的家。我和他们一样，一路奋斗不息。他们从农村走向成都、再到上海，而我也凭借努力考入上海顶尖高中，并最终被加州大学伯克利分校录取，主修计算机科学与经济学。中美两地的求学经历，不仅拓展了我的视野，也让我更加坚定地想回到中国，将所学投身于这片正在深刻变革、蓬勃发展的土地。

在海外生活多年，我愈发体会到，中国才是我最牵挂的地方。相比资本主导、发展趋于稳定的西方社会，我更渴望参与中国经济与社会的快速建设。在我看来，温饱早已不是人生的终点，而财富也不是衡量价值的唯一标准。我真正想做的，是有意义、有温度的事情——为社会创造真实改变，同时实现内心深处的自我价值。

因此，我希望将人工智能与经济管理结合，服务最广大的普通人群体。我曾在硅谷风投公司担任分析师，也曾在医疗科技初创企业担任 AI 工程师，参与心电图信号识别算法的优化。这些经历让我深刻认识到：技术只有扎根于中国现实的土壤，回应本土社会的真实需求，才真正具备生命力。我热爱创业，享受为自己的公司和目标负责的过程。短期来说，我希望通过创业完全解决我的生存问题，让我有更多时间来做我想做的。而长远一点的未来，我希望创立一家将前沿科技与中国社会深层需求结合起来的企业，做有社会责任感、能切实改善现实问题的创新。

北京大学光华管理学院所秉持的“因思想而光华”的精神深深打动了我。光华不仅是中国最具思想深度的管理学院之一，更通过“中国系列”课程系统探讨中国的经济、金融与社会现实，立足本土、面向世界。这正是我在海外教育中最为欠缺、也最渴望深入学习的部分。

同时，我希望将自己独特的成长经历与跨文化视野带入光华课堂。我来自农村，亲历底层民众的真实困境；也在世界一流大学接受了严谨的多学科训练，在科技与商业的交汇点上积累了宝贵经验。我期待在光华这个思想开放、文化多元的平台上，与优秀的同学们深入交流、互相激发、共同成长。

从自贡的泥土中走来，我始终相信教育和奋斗能改变命运。但今天，我不再满足于仅仅改变自己的命运，而是希望为更多人带去可能；不再只追求个人成就，而是希望回应社会更深层的挑战。我真诚希望，能够在北大光华度过一个充实而深刻的学期，汲中国智慧，明世界大势，为我脚踏实地的创业之路积蓄思想与能量。

2. 你的个人亮点：请列举 3 条以上个人亮点

1. 跨越城乡与中外的成长经历
   出生于四川自贡农村，通过自身努力进入上海顶尖高中，并赴美国加州大学伯克利分校就读，实现了从乡村到世界顶尖高校的跨越，具备强烈的自我驱动力与适应力。
2. 中美双重学术视野 + 交叉专业背景
   同时主修计算机科学与经济学，具备技术与人文兼备的知识结构；在伯克利系统学习西方经济理论，也渴望深入理解中国经济与社会现实，具有跨文化比较与整合能力。
3. 社会责任感与创业目标
   不以个人财富为主要驱动，而希望用技术服务更广泛的普通人群，关注教育、医疗等民生领域，立志通过创业回应中国社会中的现实需求，实现个人价值与社会贡献的统一。
4. 扎实的实践经历与实操能力
   曾在硅谷风投公司实习、医疗科技初创公司担任 AI 工程师，拥有将技术知识应用于实际商业和产品开发中的能力；还组织并管理多个学生项目，具备良好的组织与执行力。
5. 语言与表达能力强，善于沟通与合作
   中英文双母语，熟练写作与口头表达；在中美两种文化环境中均能自如交流，曾在学生组织与社团中担任管理职位，具有良好的人际交往与协作能力。

3. 可以补充个人简历中未提及的学习/实习/活动/公益/创业/爱好/研究等经历。

1. 教育公益营地创办经历
   我曾联合朋友创办“CCC”，为农民工子弟提供免费的人文与科学课程。项目至今已累计为 200 多位学生带来系统的学习体验。这段经历让我深刻理解教育资源不平等的问题，也让我意识到技术和知识应该向下扎根、向外辐射。

2. 创业尝试：留学生学业辅导平台
   我曾在伯克利尝试运营一个面向中国留学生的学业辅导平台，结合自己在 CS 和经济方面的专长，帮助新生更好适应学业挑战，并通过社交平台（如小红书）进行用户推广。虽然规模不大，但让我初步实践了市场调研、定价、用户运营等完整流程，也明确了我对创业的兴趣和热情。

3. 音乐与街头文化兴趣
   课余时间，我喜欢 DJ、Beatbox 和街拍摄影。曾在俱乐部兼职驻场 DJ，参加全国 Beatbox 线上赛获得八强，也担任伯克利 Acapella 团体的成员。我相信这些表达方式不仅是兴趣，更是跨文化沟通的桥梁，也让我保持对生活的敏感与创造力。

Personal Statement

1. What is your motivation for participating in the Guanghua Visiting Program?

I come from a rural village in Zigong, Sichuan. My parents have worked hard to provide me with a warm home. Like them, I've fought hard for every step forward. From the countryside, they moved to Chengdu and eventually to Shanghai. I, too, advanced through perseverance—earning admission to one of Shanghai's top high schools and later to the University of California, Berkeley, where I now major in Computer Science and Economics. My academic journey across China and the U.S. has broadened my horizons and, more importantly, strengthened my desire to return to China and contribute to a society undergoing rapid transformation and development.

After years abroad, I've come to realize just how deeply connected I feel to China. Compared to the West—where capitalist systems dominate and development has plateaued—I'm far more drawn to being part of China's dynamic economic and social construction. To me, basic financial security is no longer the ultimate goal in life, nor do I see personal wealth as the highest measure of success. What I truly hope to pursue are meaningful, impactful endeavors—those that create real change in society and fulfill my deeper sense of purpose.

As such, I aim to integrate artificial intelligence and economic management to serve China's broader population. I've interned as an analyst at a Silicon Valley venture capital firm and worked as an AI engineer at a healthcare startup, where I helped optimize ECG signal recognition algorithms. These experiences have shown me that technology only has true vitality when rooted in local realities and serving the needs of real people. I'm passionate about entrepreneurship—I enjoy being accountable to my own goals and building something of value from the ground up. In the short term, I hope to use entrepreneurship to fully secure my livelihood so I can devote more time to what truly matters to me. In the long term, I aspire to establish a company that aligns cutting-edge technologies with China's deeper societal needs—creating innovation that is both socially responsible and genuinely impactful.

What draws me to Guanghua School of Management is its guiding spirit: "Glory through Thought." Guanghua is not only one of the most intellectually rigorous business schools in China but also offers deeply rooted, locally relevant courses through its "China Series." These courses explore China's economy, finance, and society in a systematic way—grounded in local context while maintaining a global outlook. This is precisely the kind of education that's lacking in my current overseas academic experience, and which I am eager to gain.

I also hope to bring my unique background and global perspective to Guanghua's classrooms. Coming from a rural background, I intimately understand the challenges facing people at the grassroots level. At the same time, I've received a rigorous interdisciplinary education at one of the world's top universities, gaining hands-on experience at the intersection of technology and business. I look forward to contributing to Guanghua's open and diverse academic environment, engaging in meaningful exchange with talented peers, and growing together.

From the soil of Zigong to the classrooms of Berkeley, I've always believed that education and perseverance can change lives. But today, I'm no longer content with only changing my own—I hope to expand what's possible for others. I no longer seek achievement for its own sake, but rather to respond to the deeper challenges of our time. I sincerely hope to spend a meaningful semester at Guanghua—learning from China's wisdom, gaining a global perspective, and laying the intellectual foundation for a grounded and purpose-driven entrepreneurial journey.

2. Your personal highlights: please list 3 or more personal highlights

1. Bridging Rural and Urban, East and West
Born in a rural village in Zigong, Sichuan, I worked my way into a top high school in Shanghai and later attended the University of California, Berkeley. This journey—from the countryside to a world-class university—reflects my strong self-motivation and adaptability.

2. Dual Academic Perspective: China and the U.S. + Interdisciplinary Background
Majoring in both Computer Science and Economics, I have a balanced foundation in both technical and humanistic disciplines. At Berkeley, I've studied Western economic theories in depth while remaining eager to understand the realities of China's economy and society, giving me strong comparative and integrative insight.

3. Social Responsibility and Entrepreneurial Ambition
Rather than being driven solely by financial success, I hope to use technology to serve broader, underserved populations. I focus on issues like education and healthcare, and aspire to start a socially responsible business that responds to real needs in Chinese society—aligning personal fulfillment with social value.

4. Solid Practical Experience and Execution Ability
I have interned at a venture capital firm in Silicon Valley and served as an AI engineer at a medical tech startup. These experiences allowed me to apply technical knowledge in real-

world business and product settings. I've also led student projects and teams, demonstrating strong planning and execution skills.

5. Strong Communication Skills in Both English and Chinese
As a native speaker of both Mandarin and English, I am confident in both written and verbal communication. Having lived and studied in both China and the U.S., I navigate cross-cultural environments with ease and have held leadership roles in student organizations, strengthening my teamwork and interpersonal abilities.

3. You can add your studies/internship/activities/public services/entrepreneurship/hobbies/research experiences that are not mentioned in your resume.

1. Educational Public Service Camp (Founder of CCC)

I co-founded "CCC," a volunteer education camp that provides free humanities and science courses to children of migrant workers. To date, the program has served over 200 students with structured learning experiences. This experience deepened my understanding of educational inequality and reinforced my belief that knowledge and technology should take root at the grassroots level and extend outward to benefit society.

2. Entrepreneurial Experience: Academic Support Platform for Chinese International Students

While at Berkeley, I launched a small academic support platform aimed at helping Chinese international students better adapt to academic challenges, drawing on my background in computer science and economics. I promoted the service through social media platforms such as Xiaohongshu. Though the scale was modest, it gave me hands-on experience with market research, pricing strategies, and user engagement, and confirmed my passion for entrepreneurship.

3. Interest in Music and Street Culture

Outside of academics, I enjoy DJing, beatboxing, and street photography. I've worked part-time as a DJ at a local club, placed in the top 8 in a national online beatbox competition, and participated in Berkeley's Acapella group. These creative outlets are more than hobbies—they are bridges for cross-cultural communication and sources of personal creativity and sensitivity to the world around me.
